EDUCATION

Turin Polytechnic University in Tashkent Tashkent, UZ
Bachelor in Software Engineering *Sep. 2020 – Present*

EXPERIENCE

Full Stack Developer June 2023 – January 2024
Scientech Solution *Tashkent, UZ*
- Employed Redux to manage state effectively, reducing reliance on props and callbacks and optimizing codebase for improved efficiency and performance.
- Leveraged RTK Query and React Router DOM to enhance data fetching and navigation within the application. Implemented animations with React Lottie and utilized React Icons for streamlined icon integration.
- Utilized TypeScript for type-safe development, enhancing code quality and maintainability.
- Developed backend functionalities utilizing Django and FastAPI frameworks for a parsing project. Implemented PostgreSQL as the primary database to store and manage project data efficiently..

Frontend Developer Dec 2022 – Feb 2023
FounderZ *Tashkent, UZ*
- Contributed to the frontend development team for a no-code application project, utilizing React.js to create intuitive and customizable user interfaces.
- Designed and implemented reusable components to enhance code reusability and maintainability, reducing development time and effort.
- Integrated canvas functionality for drawing objects within the application, providing users with interactive features and visual customization options.

Software Developer, Intern Aug 2022 – Oct 2022
iTransition *Remote*
- Contributed to improving website efficiency by writing algorithms, particularly for optimizing search systems, enhancing user experience and performance.
- Demonstrated adaptability and a willingness to tackle new challenges by learning C# for backend development projects.
- Gained valuable experience working in a fast-paced environment, learning to thrive under pressure and deliver results within tight deadlines.

Teacher May 2022 – Aug 2022
Juniorcode *Tashkent, UZ*
- Instructed students aged 5-9 in Scratch programming language, fostering creativity and logical thinking through interactive projects and games.
- Taught frontend development to students aged 10-18, covering HTML, CSS, and JavaScript, fostering a deep understanding of web development principles.

PROJECTS

Property Rental App | *Python, Django, React Native, SQLite, Swagger* Oct 2024 – Dec 2024
- Developed a cross-platform mobile application using React Native, Redux, and TypeScript, providing users with seamless access to property rental services on both iOS and Android platforms.
- Implemented JWT authentication to secure user authentication and authorization processes within the application

Messenger App | *Flask, SocketIO, Jinja, Bootstrap* March 2022 – May 2022
- Developed a real-time messaging application using Flask, Socket.IO, and Jinja, enabling users to communicate instantly with each other.
- Designed and implemented features such as user authentication, message broadcasting, and private messaging to provide a comprehensive messaging experience.

TECHNICAL SKILLS

Languages: JavaScript, Typescript, HTML/CSS, Java, Python, SQL (Postgres, MYSQL), NoSQL(MongoDB)
Frameworks Libraries: React, ReactNative, Node.js, Laravel, Django, Flask, FastAPI, Ant Design, Tailwind
Developer Tools: Git, Docker, Google Cloud Platform, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse
